**PHILADELPHIA**

**SATURDAY, MAY 15, 1864**

THE LIBRARY OF ENTOMOLOGICAL SOCIETY OF PHILADELPHIA, VOL. II. part 2 just published, and Lilly, Boston, and Carey and Hay of Chestnut and Fourth streets, Philadelphia. The present number of this work contains description of fruits, perhaps of all kinds in the known world, exhibiting its time and history. We observe there are of sixty different generic classes of the and agreeable vegetable productions, which are indigenous to our own country, and which are adorned with wood, engraving representing the various fruits; and the details are lucid, satisfactory, and so done correct in almost every instance.

"The United States Arithmetic Science of Arithmetic simplified—The Commerce of the United States—the most useful practical rules of the illustrated by a large collection of examples of which are composed of historical John Ross." The title page of the book is complete that it stands in need neither of nor commentary. The first is not, however, and towards the latter, we make a remark, that it appears to be a very apt epitome of this branch of the Mathematics.

**MECHANICS VS. ARISTOCRACY**  
Artificial distinctions in rank, which arearchical and aristocratical governments considered necessary for the preservation of society, have many advocates in public. Those who are conscious of such distinctions are unwilling to forego the

frequently make themselves re-  
endeavors to excite respect. No-  
ed an advantage in almost re-  
ancestral honors, under our de-  
stitutions, are but of little conse-  
it because they serve to gratify  
sor with an idea of his own im-  
withstanding all this, many at-  
made by the patriots, even in  
States, to maintain what they con-  
sidered dignity; and these at-  
long time regarded by the "we"  
with an appearance of passive re-  
But we are pleased to see that  
now begin to assert their rights  
citizens of these States; they be-  
worth and their power; that the  
crum which supports the engine  
and gives it its energy and effi-  
cacy, in short, the most useful,  
ought not to be the least honorable  
society. They are forming among  
ous parts of the nation, and  
strength has already become a  
element of the assistance.

great alarm of the stockholders of Albany, N. Y. the election of Albany, N. Y. the with an entire defeat, and the completely triumphant. Without any particular party in power we cannot but rejoice in this season of peace and industry over private affairs. While on this subject, we must not omit to mention a very valuable report made by a committee of the State of New York, that it would be proper to add to the title of "HIS HIGHNESS THE PRINCE OF WALES, PRINCE OF THE UNITED STATES AND PROTECTOR OF THEIR RIGHTS" the words "PRINCE OF THE STATE OF NEW YORK." This report was postponed. We believe the President himself is not enough to reject such an absurd designation. Aspirations after power have been the ruin of many—not content with the power as it is, but desiring to be a monarch, but perished in the attempt to do so empty a thing as the name of a monarch.

**EDITORIAL QUARREL**

Something like an affray took place between Messrs. Duff Green and James Watson on the 6th inst., at the west front of the Washington city. The former goes to the city, and the latter to the city.

[illegible]

Security of Steam Boats.

For the purpose of introducing into the United States, the bill, with an auxiliary introduced with it, was unanimously passed. This bill requires, in addition to the usual certificate of the master of a steam boat, a certificate of the engineer, a certificate of the boiler, and a certificate of the machinery. It also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed.

The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed.

The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed.

The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed.

The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed.

The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed.

The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed.

The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed. The bill also requires that the master of a steam boat should be a resident of the State in which the boat is licensed, and that the engineer should be a resident of the State in which the boat is licensed.

build all the monuments. Mrs. Ware has the most reason on her side—Mrs. Hale the most fancy. We are with both parties, and both sides the question—wherever woman is, there must be a—Reading Chron.

From the Wisconsin Chronicle. IMPORTANT DISCOVERY.—Some lady is a neighboring town within a week past highly delighted with the new law giving a bounty of \$100 on every cow, but thinking the bounty too low for the trouble she had to go through in killing the cow, she has now discovered a more profitable way of disposing of her cow, and she has now discovered a more profitable way of disposing of her cow, and she has now discovered a more profitable way of disposing of her cow.

The following note was found at the bottom of a chest of tea, imported by the Parthian, a respectable merchant in Baltimore, and forwarded to this city for the information of the person alluded to. There are eleven in the name of John Wilson in our Directory.—N. F. Gas. "If this box of tea should find its way to America, and should be opened by an American, I wish he would inform my brother, John Wilson of New York, that I am in prison as a prisoner, 1829."

From the New-York Commercial Advertiser. SLEEP WALKING.—A singular case of somnambulism was mentioned to us by a friend from Hudson, on Saturday. It appears that a Captain Q. X., of that city, is in the habit of getting up in his sleep. One night last winter, soon after the ice formed upon the river, and while his surface was as bright as a polished mirror, Mr. X. was discovered in the course of the night to have left his bed and board, with nothing but his shirt, drawers and stockings for a covering. Pursuit was made, and he was found cowering among the stumps. But he fled from all who approached with amazing swiftness, dodging corners, and threading streets and alleys like a police officer, or a rogue running away from one. At length, finding his pursuers to get upon him, he took to the river, and ran out upon the ice, where he put them at defiance, for he sported upon his glass surface, like a skater cutting the name of his mistress with his heels upon the ice, and they dared not follow him, expecting every moment, that he would sink through the treacherous bridge. But he finally awoke, and came ashore in great terror and exhaustion. Later, this nocturnal adventurer had another frolic in his slumbers. He went to bed quite early in the evening, and called forth at about 11 o'clock—taking the Coleridge turnpike, leading to Sheffield—having the same scene as before. Several persons met him on the road between Hudson and Glenshire, forcing it along at a prodigious rate, but not knowing the cause, and some doubting his materiality, his progress was not opposed until he had clean passed the village of Claverack, crossing the bridge at Van Rensselaer's Mills, and was ascending the gentle hill beyond. Here a stout negro man of some sense, returning rather late from a blissful visit to his dinky Amariel, perceiving that the man must either be crazy or asleep, sprang before and grasped him in his arms. The white rover struggled with him for a moment, but Jugartha threw him to the ground, and he awoke by the shock of the tumble in wild fright—believing himself in the hands of the devil, and uttering a wild note of alarm accordingly, which flung him very philosophically upon the ground. "You berry hard to wake, massa." After the hypo-paetic had picked himself up, and found out by the light of the moon, and the protestations of Syphax, that he was no nearer Gehenna than the border between Claverack and Spencertown, and that his companion was as honest a fellow as though his skin was white; he went to a farm-house, much exhausted, and was kindly taken in, after the inmates had become satisfied that ghosts do not walk abroad in such muscular and substantial frames. Next morning he returned home in a borrowed suit, much to the relief of his friends, who were greatly distressed by the position that he attempted to go on board of his vessel in his sleep. He had fallen into the river from the wharf. The fleetness and energy of Mr. X. were remarkably displayed on this occasion; for, by calculation of the time, he must have travelled above six miles in the space of an hour.

Riot among the Gold diggers.—Accounts received from the Gold regions, state that a serious affair has recently occurred among the diggers in the Cherokee Nation. We have heard nothing of the origin of the rencontre, but understand that a party of fifty or sixty Carolina emigrants, who had been driven from Georgia, for the purpose of driving them from a branch in which they were digging—after a warm contest the Carolinians were driven off, and the Georgians remained masters of the mine. It is said one man was mortally wounded by a blow from a spade, and has since died—several others were badly hurt. The civil authorities should look to it.—Georgia Statesman.

The Virginia Free Press says.—The Engineers belonging to the Chesapeake and Ohio Canal Company, have lately been engaged in the neighborhood of Harper's Ferry, in making up the route of that magnificent work. We expect to see, in that vicinity, during the present season, all the bustle and activity which have recently been exhibited on other parts of the route.

CONGRESS. In the Senate, on Monday, the bill for a subscription to the Washington Turnpike was ordered to be engrossed, by a vote of 37 to 19. The bill to reduce the duties on Coffee, Tea, and Cocoa, was taken up; and a motion by Mr. GAVIN, to lay it on the table, was rejected, 39 to 17. The Senate then went into executive business.

In the House of Representatives, some resolutions adverse to the renewal of the Charter of the United States Bank were laid on the table, by Mr. PORTER. The Bill reported by the Committee on Manufactures was taken up for discussion, when Mr. BURGESS spoke at great length in support of the Bill. He was followed by Mr. BOULDER, of Virginia, on the other side.

The NEW ORLEANS BEE, of the 16th of April, contains the following statements respecting the present condition of MEXICO, from the pen of a gentleman who has resided several months in that country. The Mexican Provinces are in the most agitated state, and have been so for these last four months.

The present party in power is called the Spanish party. President Guerrero lives at the country seat. Gen. Bustamante, the Vice President, having a large part of the army under his command, attained the ascendancy over the Spanish party, (as they are called,) and forced President Guerrero to retire from the Presidency. Zavala, the late Secretary of State, has been arrested, with a number of other respectable individuals, in the city of Mexico, and their property confiscated for the use of Bustamante and his troops.

Civil war rages throughout the Provinces. About three weeks ago, a force of one thousand men was sent to arrest President Guerrero—he received information of their intention, and retired to the mountains with five hundred men, where he is increasing his forces, and bids defiance to the party in power.

Several battles have been fought with little success on either side; the opinion is, that the present party will soon be out of power—at the present moment Mexico is the most despotic Government under the Globe. The Constitution is treated as a piece of blank paper—the Military rules the people, both high and low, with an iron hand.

Parades are arrested and imprisoned by order from Bustamante and his officers, as suit their pleasure. The Finances are in the most deplorable state. Some months ago the Government borrowed large sums of money from the merchants, for which they gave their paper—which paper was to be paid in payment of duties; but such is the dishonesty and tricks of the present ruler, that they have broken their contracts and refuse receiving their notes in payment of duties.

On the 2d March, 1839, orders arrived in Vera Cruz, instructing the Minister of Finance (a Commissioner General) to receive only 15 per cent. paper in payment of duties; so by this trick, the merchants have been swindled out of millions of dollars.

In the future when a vessel arrives consigned to a person holding Government paper, they must pay the whole amount of duties in cash, with the exception of the 15 per cent. allowed to be paid in paper. All vessels arriving in the Port of Mexico, must pay the amount of duties on their cargoes forty days after their arrival—the vessel bringing the goods is not to leave the port until the duties are paid. The prohibitions on cotton goods and brandies are taken off, this has not become a law, but both houses unanimously agree it should be so, and the Vice President, Bustamante, gives orders accordingly. At the present moment it would be dangerous to ship either cotton goods or brandy, as it is ten to one if they do not change their minds, reverse their order, and condemn the goods.

The Province of Yucatan has declared itself free and independent of the Mexican Republic, and will listen to no terms from Bustamante or his party. Their Navy is nothing but a name; having no armament, men, state or money. Com. Lopez, who has commanded in Vera Cruz for some time, has been broke, and now keeps a mountebank (or gambling table) for his support.

The famous General St. Anna lives at his country seat, like another Cincinnati, and it is the opinion of all good Mexicans as well as foreigners, that he is the only man who can save the country in its present state of anarchy and civil war.

By the last accounts from the city of Mexico, many assassinations had taken place; several of the Members of Congress had been arrested and dragged out of the Hall of Congress by order of Bustamante, the President, without any reason being assigned.

The fact is, Bustamante and his military use the Congress (which is made perpetual) as his tools and instruments of vengeance. In the different Provinces, the Governors, Judges, and other civil officers of the state, are treated with the utmost contempt by Bustamante and his Commandant-Generals of the Provinces; they act as accusers to judges, imprison and condemn at their pleasure—all power being taken out of the courts of justice.

In Vera Cruz, the Commandant General, Landero, formerly a pettifoggery lawyer, is one of the most despotic chiefs in the country; his second in command, possessed in a remarkable degree, with his military to boot, of the most perfect and complete character. He is a man of great energy, and is a man of great energy, and is a man of great energy.

The verses written by the late Col. W. T. Garrison, will be published next week. The "Old Dick," sent to us from Washington, city, will meet with early attention. Lines addressed to "Scio" are accepted.

We are pleased with the verses sent to us by "H," and will insert them as soon as circumstances will permit. We wish some of our friends, who are skilled in writing "Tale," would send us some specimens of their talent in that way. We should like them to be brief, judicious, entertaining, and completely original, if possible.

"CHRIST REJECTED." We are instructed to say that this magnificent painting will remain in its city one week longer, to the 22d inst., when it will positively be removed to Baltimore.

General Washington's nephew, Mr. Washington Custer, has written a Drama called the Rail Road Carriages, which will be played at the Walnut street Theatre this evening.

We learn that Mr. Thomas Finch this morning resigned his post as Cashier of the Mechanics' Bank, and that Mr. Mitchell, one of the Tellers, has been appointed to succeed him.

Professor Thompson will give a discourse in the Universalist Church, Calhoun street, on Sabbath, the 16th instant, at half past three o'clock, P. M. The subject of the discourse will be, the scripture doctrine of a future state, contrasted with the errors of ancient and modern times.

FOR SALE CHEAP. A handsome new 3 story brick house with Piazza, Kitchen and Bath Room, situated in Twelfth street, just below Race, west side. Also, a neat 2 story house in Jersey street. Inquire at No. 9 Jersey street. May 15-16
